ESG @ FEMA

Dr Jonathan Spiteri
Senior Lecturer – FEMA, University of Malta

ESG

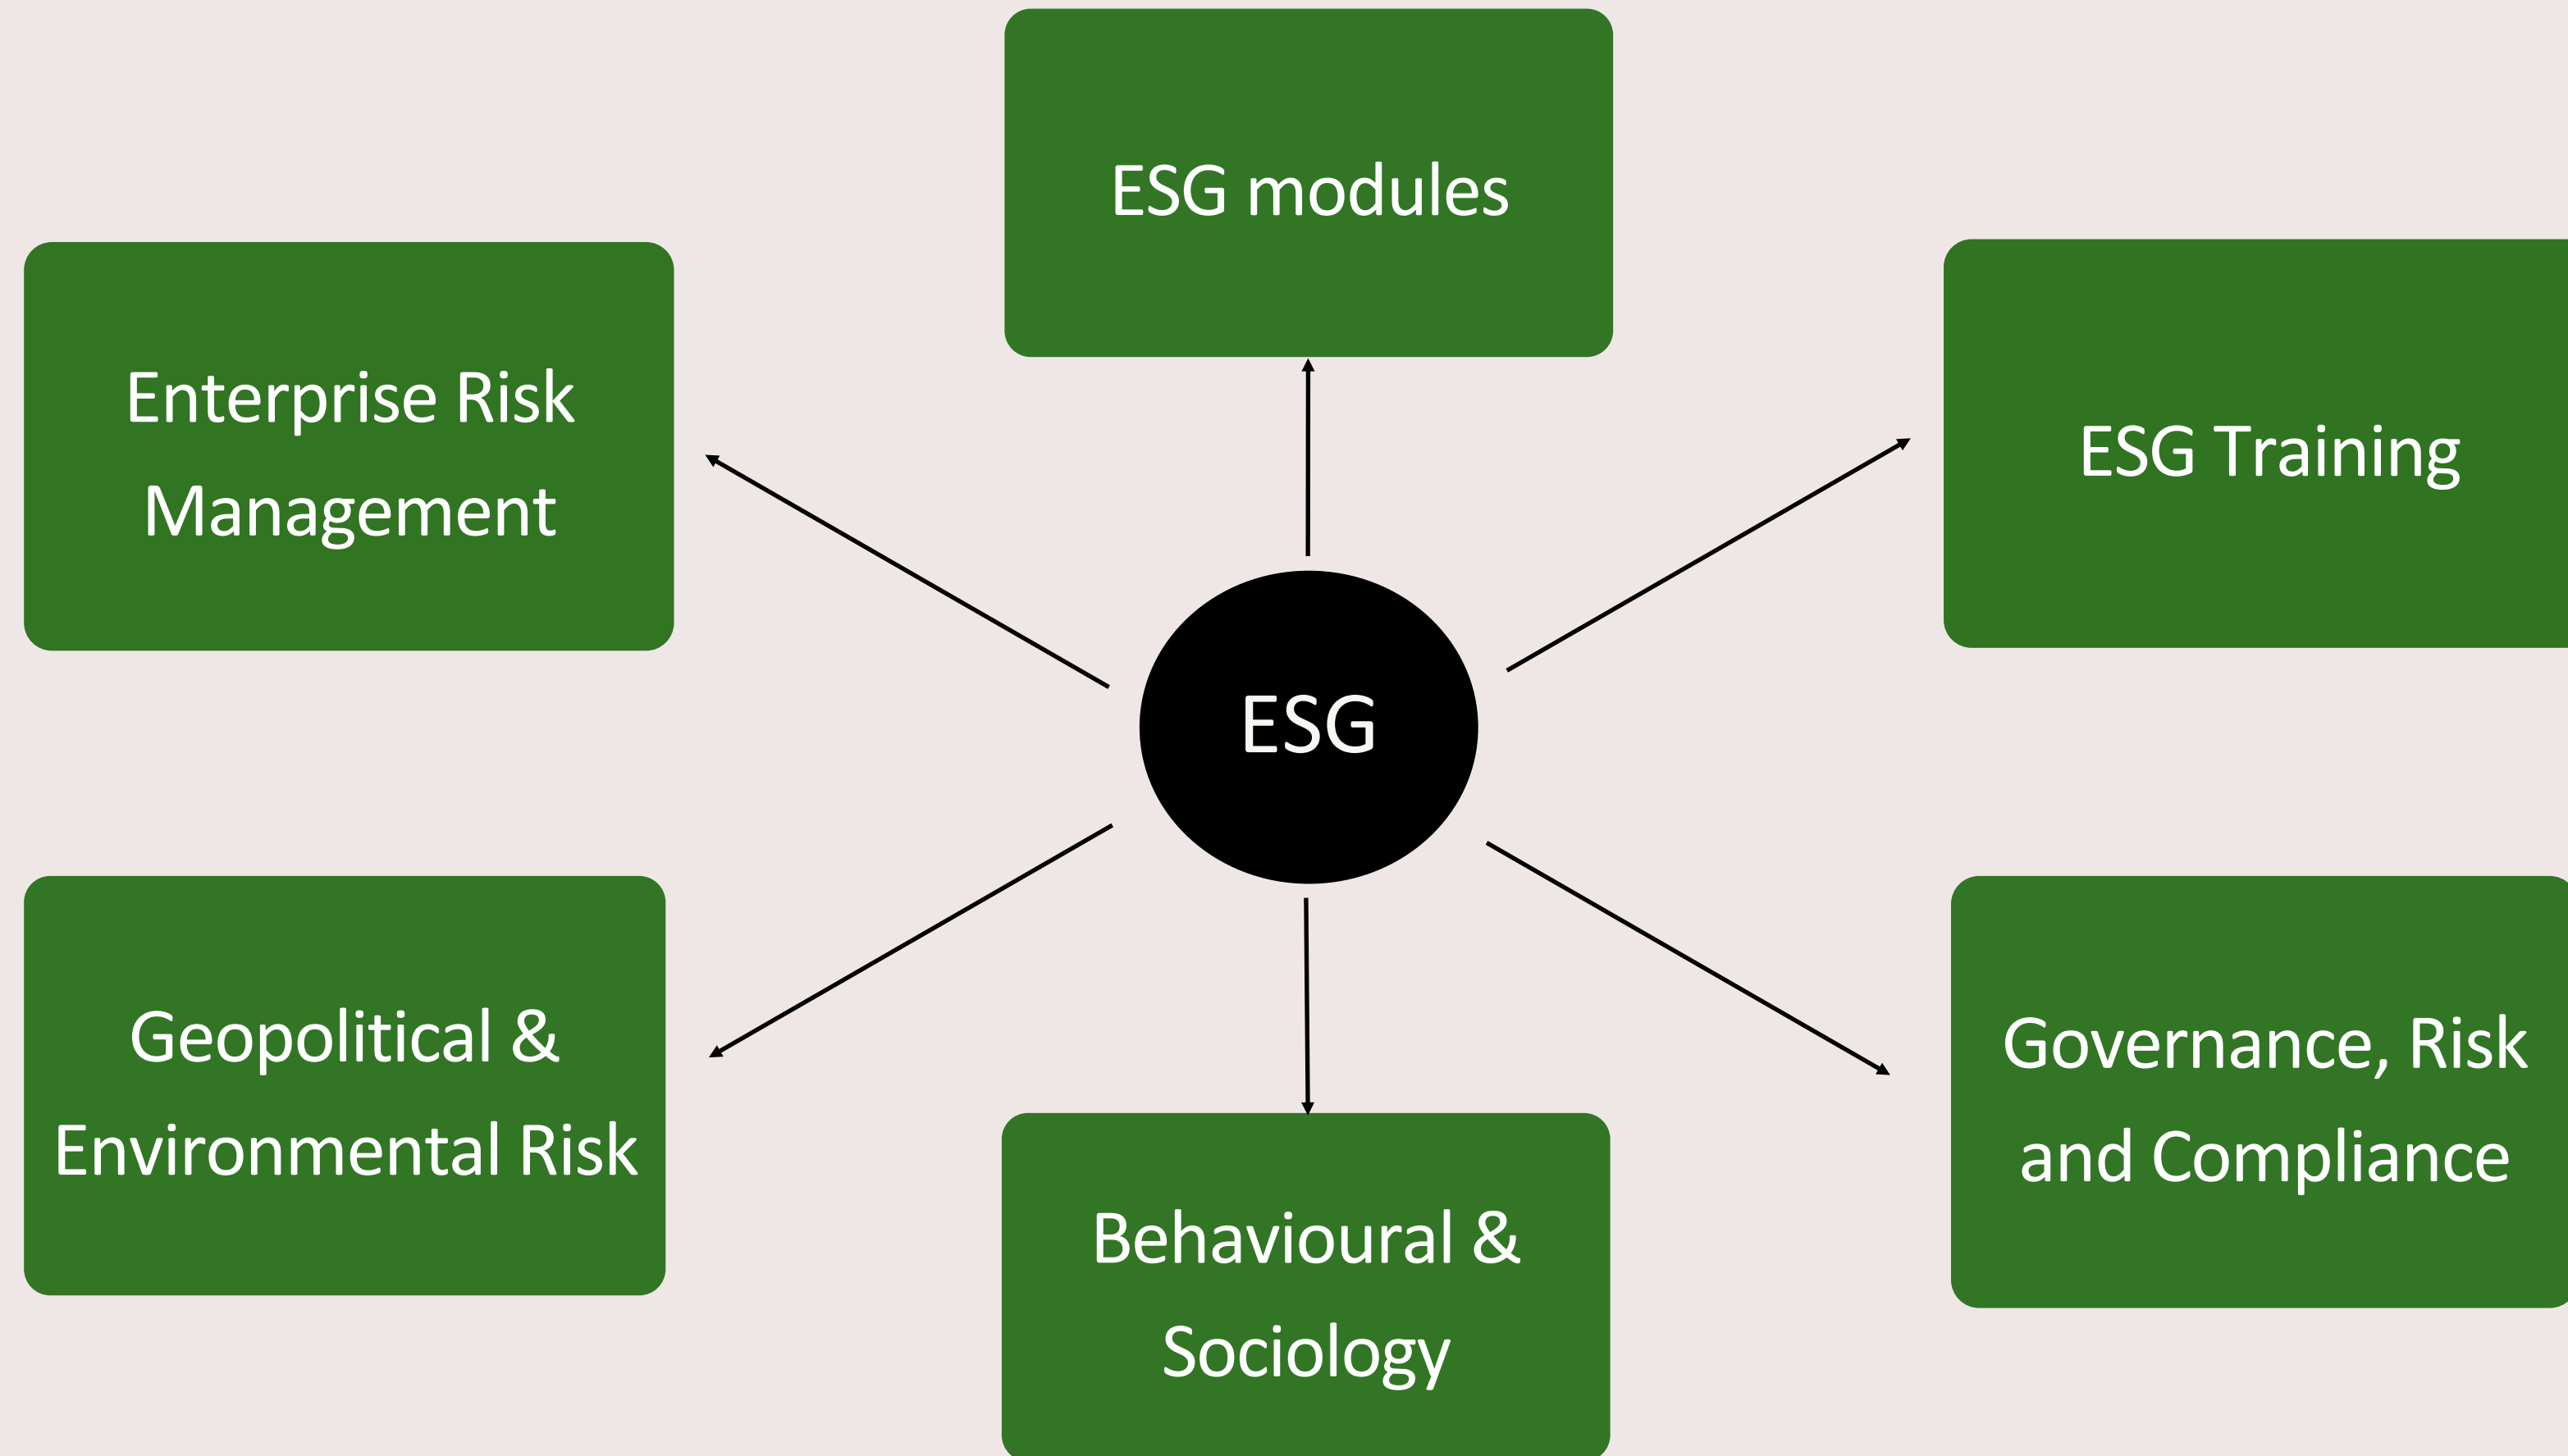

We deal with it in a holistic manner – the E, the S and the G, due to interlinkages

Approach is pragmatic and strategic - ESG issues create significant risks & opportunities for business

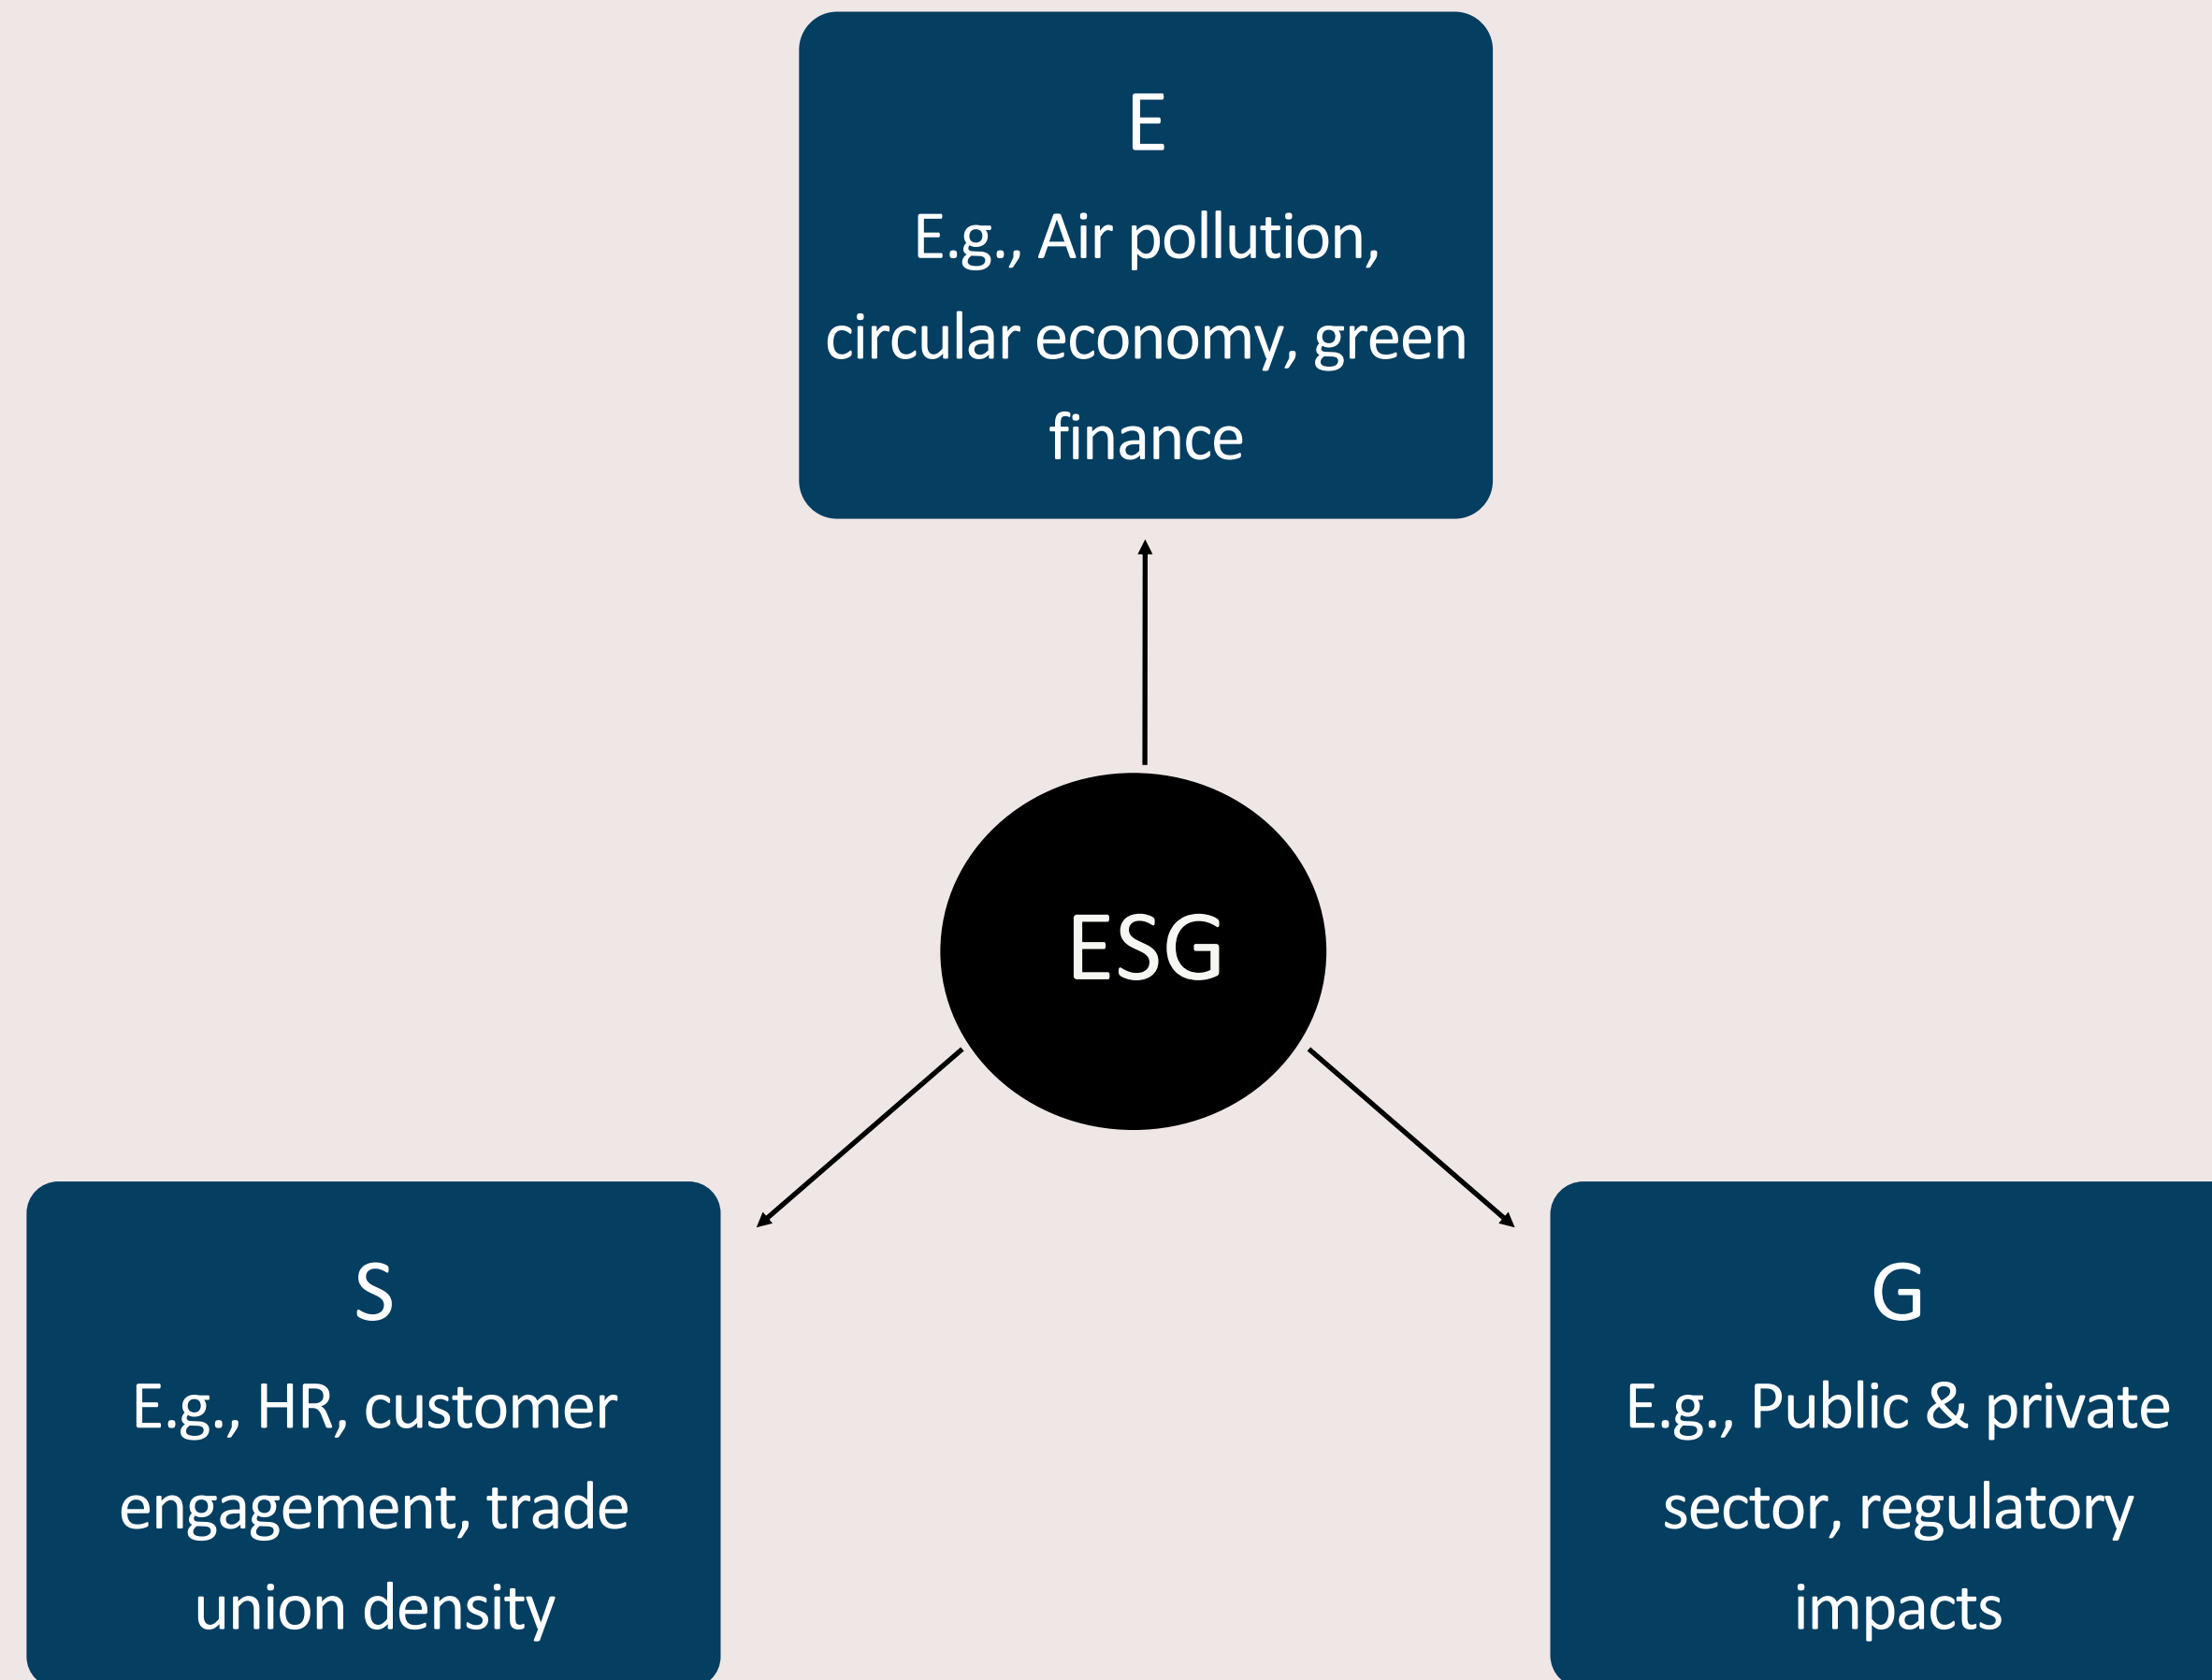

Issues framed within the context of existing and upcoming EU directives and regulations on ESG – e.g., CSRD, CSDDD, etc.

Focus is on integrating ESG issues and thinking within everyday business operations and strategy, not solely on compliance with EU directives or reporting
